Experience

JULY 2022 – PRESENT [4+ YRS]

Verizon | SDE-II | Chennai, India - Hybrid

- Designed and delivered enterprise full-stack systems using **React, Python/FastAPI, Angular, Node.js, and .NET/C++**, powering internal publishing platforms and business analytics dashboards integrated with AWS S3 data pipelines.
- Architected scalable backend services and APIs for real-time metrics processing, ensuring reliable data flow and production-grade performance.
- Built a **Go-based Contacts Backup & Restore microservice** from scratch for the VzProtect ecosystem (100M+ users), designing concurrency-safe architecture and deploying on **Kubernetes** for high scalability and fault tolerance.
- Developed feature management consoles for large-scale consumer applications, enabling controlled configuration, monitoring, and release workflows.
- Designed and implemented an AI-driven customer support agent, structuring knowledge-base orchestration and backend workflows for automated resolution.
- Owned end-to-end SDLC including system design, edge-case handling, testing strategy, CI/CD automation with Jenkins, and production deployments across cross-functional teams.

Skills

Languages: Python, Go, JavaScript, TypeScript, C++, C#
Frontend: React.js, Angular, Next.js, Redux
Backend: Node.js, FastAPI, Django, .NET, REST APIs, Microservices, gRPC
Distributed Systems: Apache Kafka, Redis, Event-Driven Architecture, Asynchronous Processing
Cloud & DevOps: AWS , Azure, Kubernetes, Docker, Jenkins CI/CD, SageMaker, Glue, Kinesis, S3
Databases: PostgreSQL, MySQL, MongoDB, Cassandra, SQLite
AI & Real-Time: AI Agents, RAG, LangChain, LLM Integration, Vector Databases, WebSockets, Streaming Architectures, ML/data pipelines
Concepts: System Design, Distributed Systems, High Availability, Scalability, Performance Optimization, SDLC

Education

MAY 2022

Bachelor of Technology | Chandigarh University | Punjab

7.2 CGPA
